

Response to Enquiries and Questionnaires Regarding REACH

The declaration of Registration, Evaluation, Authorisation and Restriction of Chemicals (REACH) compliance applies to products supplied by The Metal Centre.

The United Kingdom withdrew from the European Union in 2021, since when UK REACH and EU REACH have operated independently of each other. Businesses based in the Great Britain (England, Scotland and Wales) must comply with UK REACH, while businesses in Europe (including Northern Ireland) must comply with EU REACH. UK importers must notify the Health and Safety Executive (HSE) of their intention to continue importing substances.

Apart from the products set out in the declaration below, our standard semi-finished products in aluminium, aluminium alloys, stainless steel and copper alloys such as sheet, plate, tube, bar and extrusions, are classed as 'articles' but do not exceed the SVHC thresholds and therefore do not need to be registered.

A copy of the production diagrams for aluminium and stainless steel is available on request, to help clarify the definitions of 'substances', 'preparations' and 'articles'.

Due diligence has been carried out on our current supplier base to establish that 'substances' and 'preparations' which require registration under REACH have been registered or confirm the absence of such chemicals. For this reason, as far as reasonably practicable, we can confirm that majority of our standard semi-finished products detailed above, don't contain any of the chemicals listed in the current Candidate List of Substances of Very High Concern (SVHC) 17th January 2023 with the exception of the declaration below:

We declare that some Aluminium & Copper/Brass articles supplied have the chemical substances, indicated in Attachment XIV of the Reach Regulation, present in quantities above 0.1% as follows:

Substance: Lead
CAS/EINICS: CAS 7439-92-1 / EINICS 231-100-4
Date of inclusion: 27-06-2018
Hazard: Toxic for reproduction Cat. 1A
H360FD - May damage fertility. May damage the unborn child
H362 - May cause harm to breast-fed children

Annex 14 of UK REACH is a copy of Annex XIV of EU REACH as it stood at the end of the transition period

and the same latest application dates and sunset dates apply, except for entries 44 to 54 whose latest application dates are 30 June 2022 (Article 127GA (7)&(8)).

You may purchase other products or metal types from us outside our normal stock range. In these circumstances, confirmation from the producer would be required that they do not contain any of the listed 'Substances of Very High Concern'.

We trust that this information clarifies our position regarding compliance under the REACH Regulations. If you have any questions or want to check any specific product, please contact us.

The Metal Centre has taken and continues to take reasonable steps to obtain representative and accurate information, but has not conducted destructive testing or chemical analysis on incoming materials and chemicals. In no event shall The Metal Centre's liability to any customer arising in relation to the declarations contained herein exceed the total purchase price of the products sold to that customer.

This Policy will be reviewed as required. The Metal Centre will continue to monitor all manufacturing processes and product changes to the REACH legislation and SVCH Candidate List.

REVISION HISTORY

Datasheet Updated	25 April 2023
-------------------	---------------

DISCLAIMER

This Data is indicative only and as such is not to be relied upon in place of the full specification. In particular, mechanical property requirements vary widely with temper, product and product dimensions. All information is based on our present knowledge and is given in good faith. No liability will be accepted by the Company in respect of any action taken by any third party in reliance thereon.

Please note that the 'Datasheet Update' date shown above is no guarantee of accuracy or whether the datasheet is up to date.

The information provided in this datasheet has been drawn from various recognised sources, including EN Standards, recognised industry references (printed & online) and manufacturers' data. No guarantee is given that the information is from the latest issue of those sources or about the accuracy of those sources.

Material supplied by the Company may vary significantly from this data, but will conform to all relevant and applicable standards.

As the products detailed may be used for a wide variety of purposes and as the Company has no control over their use; the Company specifically excludes all conditions or warranties expressed or implied by statute or otherwise as to dimensions, properties and/or fitness for any particular purpose, whether expressed or implied.

Advice given by the Company to any third party is given for that party's assistance only and without liability on the part of the Company. All transactions are subject to the Company's current Conditions of Sale. The extent of the Company's liabilities to any customer is clearly set out in those Conditions; a copy of which is available on request.
